EDUCATION

Temple University　　　　　　　　　　　　　　　　　　　　　　Philadelphia, PA
Bachelor of Science in Computer Science　　　　　　　　　　　　*Aug. 2023 – May 2025*

Community College of Philadelphia　　　　　　　　　　　　　Philadelphia, PA
Associates of Science in Mathematics　　　　　　　　　　　　　*Aug. 2021 – May 2023*

EXPERIENCE

Information Technology Intern　　　　　　　　　　September 2024 – December 2024
SNIPES USA　　　　　　　　　　　　　　　　　　　　　　　　　*Bensalem, PA*

- Developed and tested Python programs, including tools to automate SDWAN updates and network traffic analysis, improving efficiency and generating organized reports.
- Fixed a critical test for the staging website to ensure functionality by identifying broken links across all pages.
- Shadowed a System Administrator to learn VM creation in Azure, Microsoft Active Directory, and other Azure tools.

Student Worker/Intern　　　　　　　　　　　　　　　October 2023 – Present
Temple University　　　　　　　　　　　　　　　　　　　　　*Philadelphia, PA*

- Created and optimized programs to automate data verification processes, improving runtime efficiency and doubling productivity.
- Deciphered SQL files and documentation to help the team understand backend functionality and query operations.
- Designed and documented automation programs, enabling team members to recreate and implement them independently.

Volunteer　　　　　　　　　　　　　　　　　　　　　　March 2020 – Present
Whitemarsh Art Center　　　　　　　　　　　　　　　　　　*Conshohocken, PA*

- Aided with the transition to MailChimp by cleaning and uploading email lists and assigning customer tags/audiences.
- Allowed the ability to specifically target specific groups for different advertisements
- Manufactured memes for the purpose of advertising classes on their social media platforms

PROJECTS

BestNotes | *Python, Qt Core, Pyside 6*　　　　　　　October 2024 – December 2024
- Contributed to a capstone project to develop a free, open-source note-taking application using Python, PySide6, and related libraries.
- Designed a moveable toolbar for app functionality and implemented customizable eraser features for enhanced user interaction.
- Created and executed tests to ensure application reliability and measured code coverage.

Projectile Launcher Rework | *Lua, YAML, JSON, RedScript*　　　December 2022 – Present
- Created a mod for the hit video game Cyberpunk 2077 that has over 45k individual downloads
- Modified game mechanics and developed new variants, attachments, and ammo for the projectile launcher using multiple programming languages.

Books and More! Database | *MySQL, Maria DB*　　　　　　March 2022 – May 2022
- Designed and implemented an RDBMS for "Books and More!" bookstore, managing inventory, customers, sales, and vendors with detailed data modeling and SQL scripts.
- Developed custom triggers to bypass a MySQL bug, ensuring referential integrity and reliable audit tracking.

TECHNICAL SKILLS

Languages: Python, Kotlin, Java, C/C++, SQL (MySQL & Postgres), JavaScript, HTML/CSS, YAML, Lua, RedScript
Frameworks: Testim.io, Microsoft Active Directory
Developer Tools: Git/GitHub, Docker, Microsoft Azure, VS Code, Visual Studio, PyCharm, IntelliJ, MariaDB, Dependency Track, Microsoft Power Automate
Libraries: Qt Core, Pyside6, Meraki, GUIZero
